

Truth and History

Truth and History

The purpose of this document is to define truth as verified historical prophecy. Truth is God's story. It is strategic and personal, the story of specific people, places, things and events. In God's story he always gives us the end from the beginning. Truth is prophetic. God always gives it to us through human prophets. He says prophecy is the greatest spiritual gift. He says for us to live, we must live prophetically. In other words, Life is prophetic. Like Jesus, we must daily hear from God. To hear, we must daily prophecy. We prophecy when we sacrifice our hearts to God, and when God changes our heart we prophecy when we record our personal Word from God. Throughout the Bible he tells us to write it down. My calling (Business Modeling, Power Measurement, and Faith Measurement) is this process of defining truth as verified historical prophecy. I provide tools to help people live this prophetic life.

Daily Strategic Communication, Like Jesus

For us to get our offering accepted, like Jesus, we must have a daily strategic two way communication with God. If we have done what he told us to do, he accepts our offering. We will do what he puts on our heart, but we must first give it to him. Like Jesus, we must daily sacrifice our hearts to God. In other words, we must daily allow our hearts to be changed by God.

Written Prophetic Story

Truth is God's written prophetic story, both the history in the Bible and the corporate and personal history that we have verified in the last 2,000 years. In life, God lets us know the end from the beginning. Truth is history. History is always prophetic. History is accounting and accounting requires accounts. The accounts must be set up from the beginning. Accounts form the outline of the story. Without the accounts, there is no meaning, no definition for the story. Like accounts, prophecy defines the story. By the way, in Truth we are not talking that other type of two way communications with God, tactical, where God through us gives his spiritual gifts to others as he puts them across the path of our calling. In the history of the saints, this type of communication does not happen daily. These are the gifts we pray for so we will be ready and useful.

Verified Historical Prophecy

Whenever I hear someone say that they do not believe in the God of the Bible, I ask them how they explain Truth. Truth is God's verified historical prophecy. One third of the Bible is prophecy. I ask them how they explain how history agrees with Biblical prophecy, perfectly, just like end from beginning. My calling (Business Modeling, Power Measurement, and Faith Measurement) is this process of defining truth as verified historical prophecy. I provide tools to help people live this prophetic life.
